Suggestions	Action Taken
The former students can share their experiences and guide the present students.	It has been decided to build a strong connection between the Alumni and the students so that the former can share their life experiences and the latter can work with the current needs of the industry and stay updated with the new modes of working.
Giving focus to industry related courses	Technical training sessions were conducted by various industries.
Additional training for higher studies and placements should be conducted much earlier, from the third year onwards.	More events and trainings regarding higher studies or placements are being conducted from the third year onwards.
